

South Sound Radiology and Radia Inc., PS Merger Announcement

January 5, 2018

South Sound Radiology (SSR) is excited to announce our merger with Radia Inc., PS.. Radia is one of the largest and most progressive radiology groups in the nation, located right here in the greater Seattle area. Together we are the largest private practice physician owned and managed radiology group in the nation.

There is tremendous mutual respect between SSR and Radia; our two practices have worked together over a number of years, holding similar values. In particular, our collective practice shares a fundamental belief in the primacy of patient care and local community relationships.

We are excited to partner with Radia. Becoming part of a larger entity will create a more comprehensive infrastructure, allowing us to better serve our patients, referring providers and hospital partners.

Today's healthcare environment is constantly evolving, producing advancements and challenges. With this partnership, SSR is re-committing to our local community, strengthening our foundation and increasing our resources. We are getting bigger to get better.

South Sound Radiology has been an anchor of the community since 1973. We are preserving our commitment to the South Sound area with our current physicians, whom you've come to trust, while expanding our physician group to bring new radiologists with additional sub-specialty expertise. SSR will continue to serve our patients and the community, as we have for more than 40 years.
